

Preconstruction Center

*Opening and Tour
for Alumni and Friends
October 29, 2009*

You are invited
to celebrate the recently
completed renovation
of the historic Industrial
Sciences Building.

The “new” Preconstruction Center in the Department of Construction Management is the industry’s gift to students.

Colorado State University
COLLEGE OF APPLIED HUMAN SCIENCES

Thank You to our 170 partner companies and organizations for sponsoring a nearly \$5 million renovation. This collaboration by industry stakeholders marks an unprecedented gift to the future of construction education.

Please join us for the opening of the new Preconstruction Center!

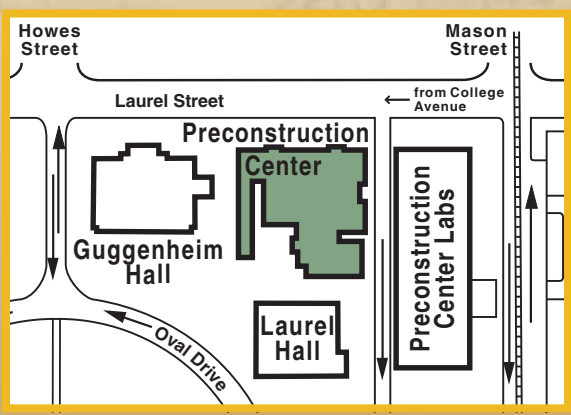

October 29, 2009
5:00-6:00 p.m.

Self-guided tours
Light refreshments

Industry representatives will be located throughout the facility to answer questions about their named rooms.

University representatives include President Tony Frank, Dean April Mason, and Department Head Mostafa Khattab, along with students, faculty, and staff of the Department of Construction Management.

The Preconstruction Center is located at 251 W. Laurel Street (east of Guggenheim Hall). Parking recommendations: The Oval, lots along Mason Street, lots north of Lory Student Center. Most campus lots do not require parking permits after 4:00 p.m. CSU parking map at <http://parking.colostate.edu>.

Permit Number 19

This project is a model of industry collaboration!

Join the Department of Construction Management as we celebrate the many companies and organizations who donated money, products, supplies, labor, and equipment to complete the renovation.

Honoring Colorado State's past, the historical Industrial Sciences Building provided a remarkable footprint for the current transformation into the Preconstruction Center.

Long into the future, this facility will be a premier space for students, providing a solid foundation as they go on to build our state's and our country's homes, hospitals, schools, roads, companies, and communities.
